REQUEST FOR EXPRESSION OF INTEREST (REOI)

Transaction Advisory Services to the Government of the Republic of Vanuatu (GoV) for the Tender of the Luganville Electricity Concession in Santo Island

The Ministry of Climate Change is responsible for activities in relation to meteorological services, geo-hazards, energy, environment and national disaster management, including general administration matters. The Ministry's role is to provide advice on these areas and to provide policy directions on all programs involving these matters.

The Luganville electricity concession had expired on 31 December 2010 and the GoV had granted to the Vanuatu Utilities and Infrastructure (VUI) to manage and operate the concession until a new contract is awarded.

The purpose of this document is to invite Expression of Interest to provide transaction advisory services to the GoV.

The GoV intends to procure the services of a Transaction Advisor representing a team of suitably qualified and experienced financial, technical and legal advisors to help with this tender and procurement process. The Government's aim is to attract private sector participation to generate, transmit, distribute and supply electrical energy to the public and other corporate bodies or private individuals within the Luganville electricity concession.

The Government through the Ministry seeks to secure the provision of safe and reliable electricity services to customers throughout Luganville. It aims to ensure that electricity infrastructure and services play a vital role in supporting economic growth and provide a foundation for private sector development.

The objective of the assignment and the works proposed to be undertaken are outlined in the Request For Expression of Interest (REOI). Copy of this document can be obtained from the Department of Energy.

The closing date for this REOI is 28 September 2015, at 11:00 am Vanuatu time.
